

# Italian Job 2 London Blag

This is it – The Italian Job 2 – thirty years of hurt put right

Everybody remembers the cliff hanger ending to the classic 60's movie "The Italian Job" where the fate of the stolen gold bullion is left (quite literally) hanging in the balance. But did you know that in fact the gold ended up going over the edge of the cliff straight back into the hands of the Italian Mafia? Not a lot of people know that. So, the time has come to get back the gold. Charlie Croker is back on the make and you are in on the team to pull off this daring heist. This is it –The Italian Job 2– thirty years of hurt put right.

Equipped with a brand new Mini Cooper, you will have just one day in London to outwit the Mafia and discover the location of the Turin Gold. At the secret 'pre-blag' briefing the plan will be revealed over the get together in central London before the job gets underway. Working as a team you'll need to navigate around London and of course be pretty handy behind the wheel. We'll need to crack the code of their new fangled computer system and since Peaches ain't around no more to look after the technical end, you better come with your thinking cap on. Along the way you'll be expected to relieve the Mafia of the cash needed to fund our next scam, so you best come prepared to "blow the bloody doors off". Having the Mafia fund their own bullion robbery is our idea of justice. It's safe to say that London won't have seen anything like it! Evade the Mob, dodge the police, and deal with the local heavies. Do whatever it takes. As a top blagger you'll be treated in fine style throughout all provided courtesy of Mr Croker.

As well as thrilling activities and an exciting day out, there will be the opportunity for everyone to work in small teams allowing them to observe and learn from people within their own group. This will enhance professional performance and foster skills that can be transferred to the working environment, such as: **communications skills, leadership and delegation, time and resource management, problem solving and team work.**
